Case Management Innovation Timeline

Overview: ARPA and Proposed Spend Plan for Enhanced FMAP

FSSA Investment Framework

FSSA established overarching goals for federal funding to enable equitable, effective, efficient, and sustainable supports to improve health outcomes, fill unmet needs, and support all Hoosiers.

Overarching Goals & Considerations

Background: Enhanced FMAP Through the American Rescue Plan Act

Provides a temporary 10% enhanced FMAP on state Home and Community Based Services expenditures from April 1, 2021 through March 31, 2022

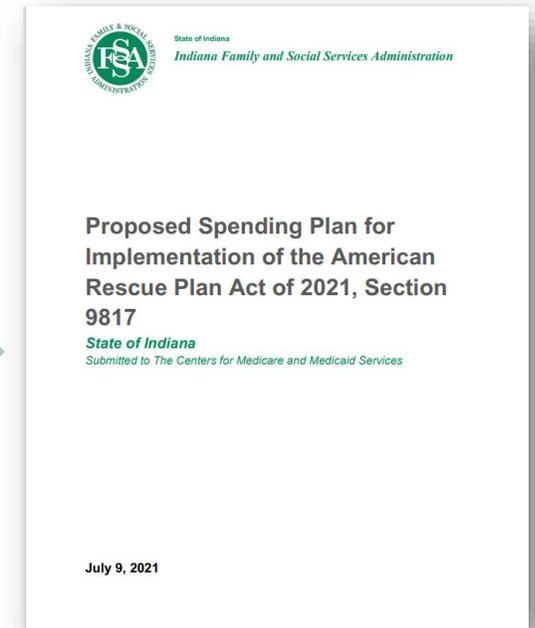

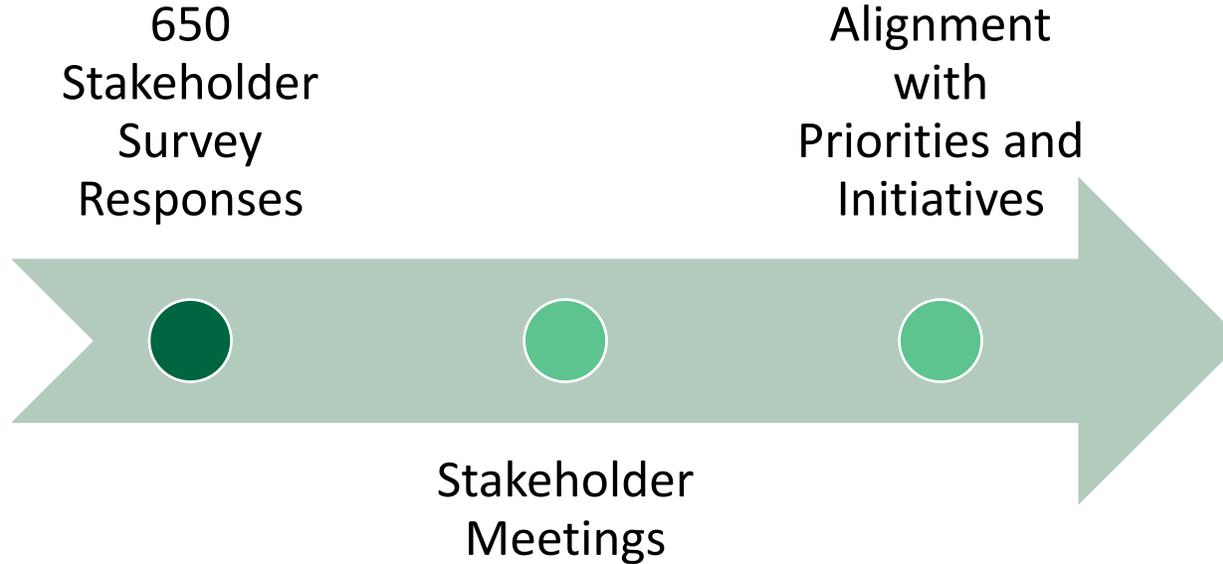

Enhanced funds can be used through March 31, 2024 to enhance, expand, or strengthen Home and Community Based Services

States are required to submit an initial plan for these funds and provide quarterly updates

FSSA's Approach to Enhanced FMAP

FSSA developed a Spending Plan for the use of enhanced FMAP available via ARPA to improve HCBS delivery and health outcomes for all Hoosiers, ensuring alignment with stakeholders, partners, and FSSA divisions.

Recommended Use of ARP Dollars and Increased FMAP

The Arc of Indiana is a state-wide advocacy organization with a mission to help intellectual and developmental disabilities realize their goals of living, working and learning in the community. We are 30,000 members strong with 42 chapters in 18 states focused on helping people with disabilities and their families receive the services and supports they need to live a good life and enjoy opportunities pro

On March 11, 2021, President Biden signed the American Rescue Plan (ARP) Act providing \$1.9 trillion to be used toward mitigating the continuing effects of the pandemic. Included within the ARP are specific dollars targeted toward home and community-based services, which includes a temporary 10% point increase of the federal medical assistance percentage (FMAP) for certain Medicaid expenditures for HCBS. The Centers for Medicare and Medicaid Services (CMS) provided guidance to state to utilize the dollars provided by the ARP and increased FMAP for activities to enhance, expand or strengthen HCBS services. Within its strong focus on HCBS services, the guidance also includes that federal dollars can be used to adequately protect the HCBS workforce, safeguard financial resources, support HCBS providers, and accelerate long-term services and supports (LTSS).

The Arc of Indiana sees great opportunity with the influx of these dollars into home and community-based services and supports. Through the 1102 Task Force and the stakeholder meeting on the Medicaid Waiver Re-Design, we are hopeful we can invest these dollars in ways to move forward and support the thousands of Hoosiers needing them.

The following list of recommendations comes from conversations with people with disabilities, their families and our Chapters as we have spoken with them over the last few months. We have shared their struggles and dreams.

We attempted to prioritize our list of recommendation and kept in mind the feedback from self advocates, families and our Chapters of The Arc.

JOBS

As we talk with self advocates, access to employment opportunities is a priority. We know that having a job leads to a greater sense of value and purpose and that alone can improve the quality of life. We need to keep in mind that access to employment opportunities includes many factors: educating potential employers about the needs of people with disabilities, providing training and support for employers, and

Achieve with us.

Opportunities to utilize American Rescue Plan Resources

Background:

During the 2021 legislative session, the Indiana General Assembly's budget bill (HB 1001) included language that would implement an increase of 14% in rates effective July 1, 2021 for certain Medicaid Waiver services provided to individuals with intellectual disabilities, which includes a provision that 95% of the increase must be spent on compensation, payroll taxes and benefits of direct support professionals. The funding to support this increase is estimated to be \$40 million each year or \$80 million for the biennium.

Concurrently, section 9817 of the American Rescue Plan (ARP) increases the federal Medicaid assistance percentage "by 10 percentage points with respect to expenditures of the State under the State Medicaid program for home and community-based services" for the period from April 1, 2021 through March 31, 2022. These Federal funds are being provided to "implement, or supplement the implementation of, one or more activities to enhance, expand, or strengthen home and community-based services under the State Medicaid program in effect as April 1, 2021." These federal funds must be used "to supplement, and not supplant, the level of State funds expended for home and community-based services."

Without additional guidance from the Center for Medicare and Medicaid Services (CMS) on the use of the home and community-based services (HCBS) funding, INARF interprets this to mean the increase in federal funding must be used for new programs, rates or services and cannot be used to replace current state Medicaid funding. The Kaiser Family Foundation estimates the State of Indiana will be eligible to receive \$138 million in new federal funding under this program.

Per the version of the ARP that passed the US House of Representatives, one of the allowable uses of these HCBS funds was defined as an increase in rates for "agencies or beneficiaries that employ direct support professionals (including independent providers in a self-directed or consumer-directed model) to provide home and community-based services under the State Medicaid program, if elected by the beneficiary for continuation of care, provided that any increase in the compensation it pays its home health workers or direct support professionals." Based on this language, the State of Indiana has an opportunity to use a portion of these new federal funds to increase rates effective April 1, 2021 on certain home and community-based services of individuals with intellectual disabilities and still have dollars for targeted investment in other areas.

In planning for the use of the ARP funds, and considering how to best implement the 14% increase approved by the Indiana General Assembly, it is useful to think of near-term emergency investments, mid-term efforts to stabilize the system, and long-term investments to invest in the future.
