TESTIMONIALS

What people say about Skylе

My computer allows me to talk to other people, write and do anything I want. I have been working with my computer since I was four years old. I like to watch movies and series and I enjoy going for walks. The most important thing for me is that I can actively talk to other people and say what I want. I think Skylе 3 is very good. I could handle the mouse well and get

along easily!

How easy it is to control

your devices with your eyes

With Skyle eye control, people with motor impairments can interact with their environment more effectively than ever before.

STEP 1

Position the eye tracker

Use the intuitive guide to quickly find the optimal position for your eyes. → Eye Tracker should be positioned in front of you. Thanks to the latest technology, the Skyle has the best-in-class field of vision.

STEP 2

Calibrate

Calibrate with up to 9 points for pixel-perfect accuracy. To make it easier, you can calibrate with less, up to only one point. Instant one-point calibration offers maximum functional accuracy.

STEP 3

Customize & get started

Customize the cursor functions and dwell time settings and you're ready for eye control with Skyle.

Communicate actively with the world - using only your eyes.

Gain access to education, the internet and entertainment with the Skyle eye control for tablets and computers.

- ✓ No training or prior knowledge required
- ✓ Compatible with Windows, Android, Mac & iPad
- ✓ Test for 14 days and then decide
